

IDEAL ES-140 Electric engraver

The original electrical engraver for conductive surfaces - made in Germany.

Engraving personalized identification in to tools and work pieces is essential to reduce and even eliminate loss, misuse and theft.

Using your free hand writing technique, our electric engraver employs arc technology to permanently mark your personal items, without the need for stencils.

Our electric engraver is virtually maintenance free. The writing tip is made of a long life heat resistant tungsten alloy, that can be sharpened for extra life or replaced if necessary.
